

POSITION: Side Control (Completed): The top player has established side control, with his chest perpendicular to the bottom player's torso and past the bottom player's leg line. The top player is elevated. [Visuals: Top player's chest is past bottom player's leg line, Top player is elevated]95%0:01

SUBMISSION: Kimura (Attempted): The top player has secured a figure-four grip on the bottom player's wrist and is controlling the elbow, attempting a Kimura lock. [Visuals: Attacker grabs defender's wrist with BOTH hands (figure-four grip), Attacker's elbow controls defender's elbow (leverage point)]85%0:04

POSITION: Guard (Completed): Bottom player establishes guard by wrapping legs around top player's torso, maintaining space and preventing top player from establishing a dominant position. [Visuals: Bottom player uses legs to control distance and posture of top player.]95%0:02

TRANSITION: Grip Transition (Completed): The inside hand releases to the head, and the outside hand releases to the shin to set up the triangle choke. [Visuals: Releasing grips to gain better control of head and shin.]85%0:07

SUBMISSION: Triangle Choke (Secured): The bottom player secures the triangle choke by positioning their leg across the opponent's neck, locking the opposite leg behind the knee, and squeezing to apply pressure. [Visuals: Leg across neck, Opposite leg locked behind knee, Squeezing legs to apply pressure]95%0:43

POSITION: GUARD (Completed): The bottom player has his legs wrapped around the top player's torso, establishing a guard position. The legs are creating control and maintaining distance. [Visuals: Bottom player uses legs to maintain distance and control, Top player's hips are not straddling the torso]95%0:01

SUBMISSION: TRIANGLE CHOKE (Attempted): The bottom player has one leg across the top player's neck and the other leg locked behind the knee, forming a triangle. The shoulder is trapped inside the triangle, but the choke is not yet fully secured. [Visuals: Defender's leg is across attacker's neck, Opposite leg is locked behind knee, One of attacker's shoulders is trapped inside triangle]85%0:01

TRANSITION: Triangle to Armbar (Attempted): The bottom player transitions from the triangle choke setup to an armbar by isolating and extending the top player's arm. The hips are positioned above the shoulder, and the legs are used to control the head and shoulder. [Visuals: Defender's arm is isolated and extended, Attacker controls hand to elbow, Attacker's hips positioned ABOVE defender's shoulder]80%0:36

SUBMISSION: ARMBAR (Attempted): The bottom player attempts an armbar by isolating and extending the top player's arm. The hips are positioned above the shoulder, and the legs are used to control the head and shoulder. Hyperextension pressure is applied to the elbow joint. [Visuals: Defender's arm is isolated and extended (elbow angle 160-180°), Attacker's hips positioned ABOVE defender's shoulder, Attacker's legs pinch around defender's head/shoulder, Hyperextension pressure on elbow joint]90%0:36

POSITION: Standing Clinch (Completed): Both players are standing and engaged in a clinch. One player has an overhook, controlling the opponent's arm and head position. [Visuals: Overhook control, head position battle]95%0:05

TAKEDOWN: Lateral Drop (Completed): The attacker steps across, secures an underhook, and drops to his hip, using leverage to take the opponent down. [Visuals: Foot step across, underhook, hip drop, leverage]98%0:27

POSITION: Side Control (Completed): The attacker has achieved side control after the takedown. Chest vectors are perpendicular, and the attacker is elevated. [Visuals: Top player elevated, bottom player flat]90%0:29

POSITION: Standing Clinch (Completed): Both players are standing and engaged in a clinch. One player has an overhook, controlling the opponent's arm and head position. [Visuals: Overhook control, head position battle]95%0:32

TAKEDOWN: Lateral Drop (Completed): The attacker steps across, secures an underhook, and drops to his hip, using leverage to take the opponent down. [Visuals: Foot step across, underhook, hip drop, leverage]98%0:35

POSITION: Side Control (Completed): The attacker has achieved side control after the takedown. Chest vectors are perpendicular, and the attacker is elevated. [Visuals: Top player elevated, bottom player flat]90%0:36

POSITION: Standing/Neutral (Completed): Both players are standing upright, indicating a neutral or starting position. This is confirmed by the pose data. [Visuals: Both players start in a standing position, facing each other.]90%

POSITION: Back Control (Completed): The attacker has moved behind the defender, establishing back control. The chest vectors are parallel, and the attacker is positioned behind the defender. [Visuals: Attacker is behind the defender, with chest-to-back alignment.]90%0:33

SUBMISSION: Rear Naked Choke (RNC) (Attempted): The attacker is attempting a Rear Naked Choke (RNC). The forearm is under the defender's chin, and the attacker's hand is positioned behind the neck. The choke is not yet fully secured. [Visuals: Attacker's forearm under defender's chin, Attacker's hand behind the neck]80%0:33

SUBMISSION: Rear Naked Choke (RNC) (Secured): The Rear Naked Choke (RNC) is now secured. The attacker's forearm is firmly under the defender's chin, forming a triangle around the neck. The defender taps out, indicating the submission is successful. [Visuals: Attacker's forearm under defender's chin, Attacker's bicep and forearm form triangle around neck, Second hand grabs own bicep]95%0:58

SUBMISSION: Heel Hook (Attempted): The bottom player is attempting a heel hook by securing a deep false grip on the opponent's foot, bending the knee past 90 degrees, and pushing the knee down towards the mat while pulling the heel. This creates pressure on the ankle and knee joint. [Visuals: Deep false grip on foot, Knee bent past 90 degrees, Knee pushed down towards mat, Heel pulled to create pressure on ankle and knee joint]90%0:04

POSITION: Turtle (Completed): The top player is in a modified back control position, with one hook in and a seatbelt grip, while the bottom player is turtled up. [Visuals: Top player establishes seatbelt grip, Bottom player defends hooks]95%0:17

SUBMISSION: Lapel Choke (Attempted): The attacker opens the lapel and secures a deep grip, setting up the lapel choke. [Visuals: Top player opens lapel and secures a deep grip, Thumb touches the tag of the gi]85%0:33

TRANSITION: Forward Roll (Completed): The attacker performs a forward roll, transitioning to a back control position while maintaining the lapel grip. [Visuals: Top player dives head under armpit, Leg extends to far side hip, Forward roll is performed]90%1:08

SUBMISSION: Lapel Choke (Secured): The attacker secures back control, crosses feet to trap the arm, and extends hips to finish the lapel choke. [Visuals: Top player crosses feet, trapping arm, Hips extend, applying pressure]95%1:11

TRANSITION: Half Guard Sweep (Completed): The bottom player uses a hook and forward pressure to elevate and sweep the top player, transitioning to top position. The sweep is completed when the bottom player elevates the top player and comes on top. [Visuals: Pulling opponent's arm towards self, Hiding opponent's forearm on hip, Activating hook to bring opponent forward, Loading opponent's weight forward, Extending bottom leg to elevate opponent]95%0:15
